

CSC 100 Story

board Alex

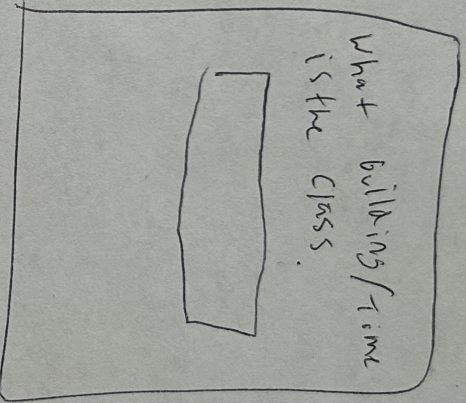

Eads

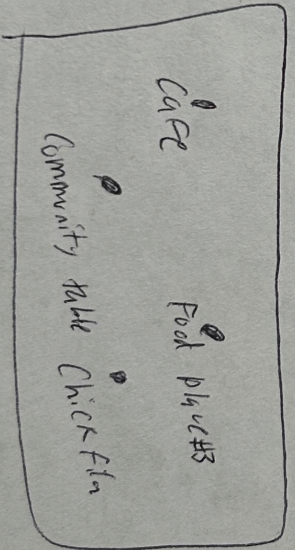

This is what a user would see when they first open the APP.

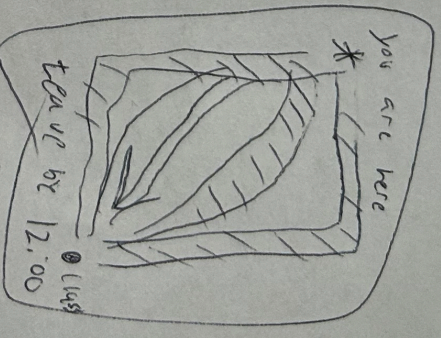

If quick weather is clicked, a brief weather report shows

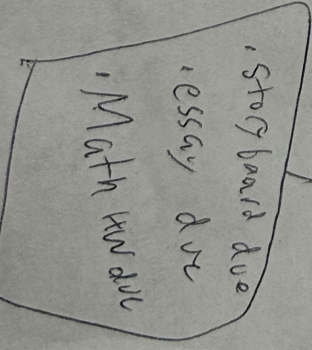

He is about to go to class, so he picked "Class routes" button.

If "Food" is clicked it will bring the user to that specific restaurant's menu.

APP highlights optimal route factoring traffic, crosswalks, construction

The calendar is a planner to help students keep track of assignments, linkable to blackboard
